The National Center for Education Statistics (NCES) is the primary federal entity in the United States for collecting and analyzing data related to education in the US and other nations. NCES is located within the US Department of Education and the Institute of Education Sciences. The NCES fulfills a congressional mandate to collect, collate, analyze, and report complete statistics on the condition of US education; conduct and publish reports; and review and report on education activities internationally. The NCES is one of four centers (along with the National Center for Education Research, the National Center for Education Evaluation and Regional Assistance, and the National Center for Special Education Research) charged with carrying out the work of the Institute of Education Sciences.

**Dataset:** Student Count - Shared-Time Schools from the Public Elementary/Secondary School Census Detail (CCD) Database

Annual headcount of shared time school students. Shared time schools are defined as a school offering vocational/technical education or other education services, in which some or all of the students are enrolled at a different school of record and attend the shared time school on a part-day basis: for example, a regional vocational center attended by students from multiple high schools on a part-day basis.

Data are from the Common Core of Data (CCD), a program of the United States Department of Education's National Center for Education Statistics that annually collects fiscal and other data about all public schools, public school districts, and state education agencies in the US. The data are supplied by state education agency officials.

For all data sets, FIPS codes for the school facility are provided. County and state numbers are calculated based on the given FIPS codes, and national numbers are created as a roll-up of the detailed numbers. Also, All Grades All Races and All Gender are created by rolling up the appropriate, given detail data. NCES datasets dates are labeled using a two-year notation specifying
