The National Center for Education Statistics (NCES) is the primary federal entity in the United States for collecting and analyzing data related to education in the US and other nations. NCES is located within the US Department of Education and the Institute of Education Sciences. The NCES fulfills a congressional mandate to collect, collate, analyze, and report complete statistics on the condition of US education; conduct and publish reports; and review and report on education activities internationally. The NCES is one of four centers (along with the National Center for Education Research, the National Center for Education Evaluation and Regional Assistance, and the National Center for Special Education Research) charged with carrying out the work of the Institute of Education Sciences.

**Dataset:** Balance Sheet by Line Item - Public Institutions from the Institutional Finance - Postsecondary Education Database

Provides finance line item data for public postsecondary institutions in the United States. Specific data elements include such items as institutional revenues by source (eg, tuition and fees, government, private gifts); institutional expenditures by function (eg, instruction, research, plant maintenance and operation); physical plant assets and indebtedness; and endowment investments.

Data are from the Integrated Postsecondary Education Data System (IPEDS) conducted by the NCES. IPEDS involves annual institution-level data collections. All postsecondary institutions that participate in federal programs providing financial assistance to students are required to report data using a web-based data collection system. This annual component of IPEDS collects data that describe the financial condition of postsecondary education in the nation. These data are used to monitor changes in postsecondary education finance and to promote research involving...
institutional financial resources and expenditures. Note that reporting requirements for private and public institutions differ, and data availability may vary by year.

IPEDS Institutional Finance data are reported by fiscal year. State and national statistics are calculated as a roll-up of statistics for institutions. Also see About US Higher Education Statistics at http://data-planet.libguides.com/UShighered
